

I recently learned the FCC is considering giving priority to LPFM broadcast stations over FM. I am against this because it could mean the loss of my favorite radio station 91.5 K-Love. This station serves me by providing commercial free Christian music that is positive and uplifting in my local community. The loss of this station would be terrible for my community because we have no other provider of this type of upliftment. This service is in the public interest because it lifts my spirits as well as many other people in my community. The positive encouraging message of the music they play is safe and encouraging to all ages. When I am driving in my car I want to be listening to music to make me happy not angry and I get that from this station. They also provide listeners with the news which is helpful. I hear other people in this community comment on things they have heard on this station and how helpful things heard on this station are. All this without commercials is a great service and that is why I support 91.5 FM K-Love with my monthly financial and prayer support. Please don't let my community lose this station.
